DELPHI development
with N. Biancacci, B. Salvant

Code available at https://gitlab.cern.ch/IRIS/ as well as with other codes and scripts.

Review and understand the mathematical developments made by Nicolas Mounet

Corrected some parts of the code, distributions other than Gaussian now working
DELPHI development

Under development:

Beam position signal plotting using DELPHI output (eigenvalues and eigenvectors)
- needs to be checked with existing results (measurements, HEADTAIL)

Preliminary results for LHC at flat-top, without damper, Qp=-1 and Qp=5
